Volume 16 1990 Table of Contents

No. 1 Platelet and Phagocyte Activation

pp. 1–220

B.S. Bull and M.H. Bull: The Salvaged Blood Syndrome: A Sequel to Mechanochemical Activation of Platelets and Leukocytes? 5

L.A. Boxer, R. Axtell, and S. Suchard: The Role of the Neutrophil in Inflammatory Diseases of the Lung 25

J.G. White, E.L. Leistikow, and G. Escolar: Platelet Membrane Responses to Surface and Suspension Activation 43

R.P. McEver: Properties of GMP-140, an Inducible Granule Membrane Protein of Platelets and Endothelium 73

M.J. Metzelaar, J.J. Sixma, and H.K. Nieuwenhuis: Detection of Platelet Activation Using Activation Specific Monoclonal Antibodies 85

L. Corash: Measurement of Platelet Activation by Fluorescence-Activated Flow Cytometry 97

A.P. Bode: Platelet Activation May Explain the Storage Lesion in Platelet Concentrates 109

R. Bjerknes, H. Vindenes, and O.D. Laerum: Altered Neutrophil Functions in Patients with Large Burns 127

B.R. Ito, G. Schmid-Schönbein, and R.L. Engler: Effects of Leukocyte Activation on Myocardial Vascular Resistance 145

R.F. Todd III, I.F. Mizukami, S.D. Vinjamuri, R.D. Trochelman, W.W. Hancock, and D.Y. Liu: Human Mononuclear Phagocyte Activation Antigens 167

J.A. Leff and J.E. Repine: Blood Cells and Ischemia-Reperfusion Injury . . 183

C.H. Packman and M.A. Lichtman: Activation of Neutrophils: Measurement of Actin Conformational Changes by Flow Cytometry 193

G.M. Vercellotti: Proinflammatory and Procoagulant Effects of Herpes Simplex Infection on Human Endothelium 209

Instructions to Authors appears on pages 217–220

No. 2/3 Malaria and the Red Blood Cell

pp. 221–634

H. Ginsburg: Some Reflections Concerning Host Erythrocyte-Malarial Parasite Interrelationships 225

R.J.M. Wilson: Biochemistry of Red Cell Invasion 237

M.E. Perkins: Commentary 253

No. 2/3 Malaria and the Red Blood Cell

pp. 221–634

H. Ginsburg: Some Reflections Concerning Host Erythrocyte-Malarial Parasite Interrelationships 225

R.J.M. Wilson: Biochemistry of Red Cell Invasion 237

M.E. Perkins: Commentary 253

L.H. Bannister and A.R. Dluzewski: The Ultrastructure of Red Cell Invasion in Malaria Infections: A Review 257
J. Vanderberg and M. Stewart: Commentary 293

B. Mons: Preferential Invasion of Malarial Merozoites into Young Red Blood Cells 299
K.N. Brown, J. Carlsson, and W. Jarra: Commentary: Merozoite Selection of Erythrocytes by Age and the Induction of Protective Immunity 313
B. Mons: Reply to Commentary 319

R.L. Nagel: Innate Resistance to Malaria: The Intraerythrocytic Cycle . . 321
L. Luzzatto and A.J. Pinching: Commentary 340
R.L. Nagel: Reply to Commentary 348

C.T. Atkinson and M. Aikawa: Ultrastructure of Malaria-Infected Erythrocytes 351
C. Slomianny: Commentary: Three-Dimensional Reconstruction of the Feeding Process of the Malaria Parasite 369

J.W. Barnwell: Vesicle-Mediated Transport of Membrane and Proteins in Malaria-Infected Erythrocytes 379
C. Braun-Breton, G. Langsley, D. Mattei, and A. Scherf: Commentary: Intra- and Extracellular Routing in *P. falciparum* 396

S.H. Abdalla: Hematopoiesis in Human Malaria 401
L. Weiss: Commentary 417
S.H. Abdalla: Reply to Commentary 419

Z.I. Cabantchik: Properties of Permeation Pathways Induced in the Human Red Cell Membrane by Malaria Parasites 421
B.C. Elford, R.A. Pinches, C.I. Newbold, and J.C. Ellory: Commentary: Heterogeneous and Substrate-Specific Membrane Transport Pathways Induced in Malaria-Infected Erythrocytes 433

K. Tanabe: Ion Metabolism in Malaria-Infected Erythrocytes 437
M. Wasserman: Commentary: The Role of Calcium Ions in the Invasion of *Plasmodium falciparum* 450

E. Roth, Jr.: *Plasmodium falciparum* Carbohydrate Metabolism: A Connection Between Host Cell and Parasite 453
L.W. Scheibel: Commentary 461
E. Roth, Jr.: Reply to Commentary 466

A.M. Gero and W.J. O'Sullivan: Purines and Pyrimidines in Malarial Parasites 467
K. Van Dyke: Commentary 485
A.M. Gero and W.J. O'Sullivan: Reply to Commentary 496

N.H. Hunt and R. Stocker: Oxidative Stress and the Redox Status of Malaria-Infected Erythrocytes 499
A.O. Wozencraft: Commentary 527

H.J. Vial, M-L. Ancelin, J.R. Philippot, and M.J. Thuet: Biosynthesis and Dynamics of Lipids in *Plasmodium*-Infected Mature Mammalian Erythrocytes 531
I.W. Sherman and P.A. Maguire: Commentary 556
H.J. Vial, M-L. Ancelin, J.R. Philippot, and M.J. Thuet: Reply to Commentary 559

J. Schrével, A. Deguercy, R. Mayer, and M. Monsigny: Proteases in Malaria-Infected Red Blood Cells 563
D.L. Vander Jagt: Commentary 585

Y. Yuthavong, A. Bunyaratvej, and S. Kamchonwongpaisan: Increased Susceptibility of Malaria-Infected Variant Erythrocytes to the Mononuclear Phagocyte System 591
P. Arese, F. Turrini, and F. Bussolino: Commentary: Is the Increased Erythrophagocytosis of Malaria-Infected Variant Erythrocytes Due to Early Expression of Normal Senescence Markers Or to the Formation of New and Specific Removal Markers? 598
K.A. Rockett and J.H.L. Playfair: Commentary: The Role of Reactive Oxygen Intermediates In Vitro and In Vivo: Some Comments 602

M. Hommel: Cytoadherence of Malaria-Infected Erythrocytes 605
J.A. Sherwood: Commentary: Progress Toward Understanding the Pathogenesis of Sequestration in Falciparum Malaria 620
